Statement from Karen Hacker, MD, MPH, Director of CDC's NC-CDPHP, on Extended Growth Charts for

Children and Adolescents with Severe Obesity

CDC released today new, extended growth charts for assessing growth and treatment of children with severe obesity. As a clinician, I encourage healthcare providers to use the extended growth charts as a tool when working with children and

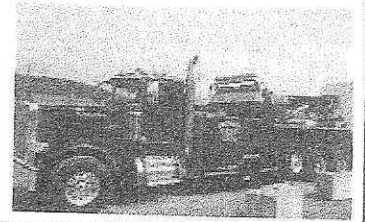

adolescents with severe obesity. Intervening early is critical to improving the health of our children as they grow into adults.

Prior to today's release, the growth charts did not extend high enough to plot BMI for the increasing number of children with severe obesity.

der to link to it. Pick a path that includes a few steps on the sunny side of the street where you can see things in a positive light instead of focusing on the gloom in every situation. Communicate your thoughts and think about how you can promote peace in your inner circle.

Aquarius 1/20-2/18

There's a warm and friendly feeling to the day that you will find agreeable to your boisterous personality, Aquarius. Find strength and peace with the people around you and work to make solid connections among your friends. The people around you are your greatest resource, so treat them with honor and respect. Stay in balance by recognizing the strength in others.

Pisces 2/19-3/20

Don't go where you aren't invited and don't take things that aren't offered, Pisces. Rules and manners are the cornerstones to healthy friendships and strong bonds among new acquaintances on a day like today. You will find that a cheery attitude and pleasant smile go a long way. Before you know it, you will be invited everywhere and offered all the things you desire.

Aries 3/21-4/19

Let your true personality shine, Aries, for this is your

day to radiate. There's an element of fantasy and deception working in the equation, but you will find that this may be just the thing you're looking for. The missing piece may come from a place you least expect, but be confident that it will come. Be open to new ideas and information, regardless of how odd they seem.

Taurus 4/20-5/20

Realize that to conquer new ground you may have to make some sacrifices, Taurus. Things may not always go according to your perfect vision, but that's the natural way of things. Life should be simple and free flowing. The tangle of voices in your mind is usually the thing that makes issues and situations more complicated than they need to be. Maintain the peace and keep things easy.

Gemini 5/21-6/20

There's a great deal of air to fuel your fire today, Gemini. Conversations will light up upon your arrival. Dreams, fantasies, and inspired wishes may come to the surface, asking you to digest them with your open, adventurous mind. Use this fuel to keep things burning red hot within you. Bring your dreams to the surface and turn them into realities by joining forces with others.

Cancer 6/21-7/22

Although you may want to bring things down a bit so

you can better plan, organize, and rearrange, Cancer, this may not be the best course of action today. You're better off keeping things light and uplifting. Things will fall into place as you need them. Trust in others. Realize that some of the best experiences you will have in life are spontaneous. Put your to-do list away.

Leo 7/23-8/22

Join others for stimulating conversation and purposeful dreaming, Leo. You aren't alone in your thoughts and strong opinions. Now is the time to be heard. Work toward maintaining peace by exposing truth. Take the time to create fantasy in your world by diluting the fears of reality. Make decisions based on love, cooperation, and prosperity instead of neediness, trepidation, and anger.

Virgo 8/23-9/22

It's time to come up for air, Virgo. Come out and take a deep breath. Experience the lightness and rejuvenation of the energy present in the air around you. Do some yoga or go for a jog to open up your channels and get your circulation moving. Use this exercise to clear your mind and open your consciousness to let new ideas and dreams be born from within.

Libra 9/23-10/22

Take a step back today, Libra, and sink into a light and dreamy fantasy world that is pleasing to you. You will find that beautiful objects and sweet fragrances catch your attention. Go shopping or indulge in a gourmet meal. The time is right to keep things open and social. Have fun and focus on your partnerships with others instead of your tendency to lead or dominate.

Scorpio 10/23-11/21

Things might be too elusive to actually grab hold of today, Scorpio. Don't be so concerned with capturing something and making it your own. See the beauty around you and hold it in your heart. Leave the flower unpicked so others who come after you can enjoy its splendor as well. There's an airy, uplifting feeling to the day that you should enjoy.

Sagittarius

11/22-12/21

This is a terrific day for you, Sagittarius. You should find that the puzzle pieces naturally come together almost effortlessly. Important connections can be made today as long as you keep all the lines of communication open. Information exchange is a key part of bringing people and ideas together in a constructive manner. A burst of inspiration can lead to a rewarding journey through time and space.

ty. The new growth charts coupled with high-quality treatment can help optimize care for children with severe obesity.

Childhood obesity is a serious and increasing problem in the United States. The Extended BMI-for-Age Growth Charts allow clinicians to track growth and visualize high BMI percentiles with families. This can help optimize care for children and adolescents aged 2 – 19 with severe obesity. Severe obesity is defined as a BMI greater than or equal to 120% of the 95th percentile on BMI-for-Age growth charts.

Providers can work with families on a comprehensive care plan to address childhood obesity. Safe and effective treatment options include Family Healthy Weight Programs, which are comprehensive behavioral treatment programs, and additional evidence-based medical treatment.

Existing growth charts for children and adolescents without obesity will not change. These extended growth charts can replace current severe obesity growth charts in Electronic Health Records. They will be useful for anyone treating severe childhood obesity.
